Advances in Heart Transplantation from Neonatal to Adult Age

Message from the Guest Editors

There have been many recent advances in neonatal, pediatric, and adult heart transplantation that are contributing to improved outcomes across all age groups. Some of these, which we would like to highlight in this issue, involve the advanced diagnosis and treatment of antibody mediated rejection, newer induction agents utilized to minimize steroid use or mitigate toxicities of other immunosuppressive agents, and alternative immunosuppressive strategies. In addition, advances in our understanding of donor factors that can affect short- and long-term outcomes following heart transplantation are of recent interest in the field, particularly in the area of predictive outcome models. We would also like to highlight surgical advances in the field of cardiac transplantation across all age groups, including the use of the Trans Medics Organ Care System (OCS) for donor organ management. Finally, we would like to report on the recent advances in mechanical circulatory support (MCS) as a bridge to heart transplantation, from veno-arterial extra-corporeal membrane oxygenators (VA-ECMO) to ventricular assist devices (VAD) and total artificial hearts (TAH).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
