

Special Issue

New Advances in Kidney Transplantation

Message from the Guest Editor

I would like to ask for your contribution to a Special Issue on advances in kidney transplantation. The introduction of new immunosuppressive medications in the 80s and early 90s has been associated with a significant improvement in graft survival, reaching a median survival of 15 years. However, two major hurdles have yet to be overcome; one is the development of chronic allograft nephropathy that limits graft survival and limited organ supply that makes kidney transplantation unavailable to many patients.

In the direction of expanding the number of kidneys for transplant, three topics will be discussed, including different approaches to increase the number of live donor kidney transplants by using ABO incompatible transplants, desensitization protocols, and pair exchange program. Lastly, in looking to the future, we will review current research to develop bioengineered and artificial kidneys.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
