Advances and Perspectives in Heart Failure

Message from the Guest Editors

Heart failure is common, accounting for significant morbidity and mortality. Although many guideline-directed therapies for patients with heart failure with reduced ejection fraction have been developed, the prevalence of heart failure is increasing because of the ageing of the population and improved treatment of acute cardiovascular events. Furthermore, there are groups of patients who do not receive sufficient benefits from existing therapies. Meanwhile, heart failure with preserved ejection fraction is a heterogeneous disorder that remains incompletely understood, and therefore, few therapies have shown significant effects. Given the large heterogeneity of heart failure, patients with multiple etiologies, cardiac phenotypes, and other comorbidities, a currently advocated “one-size-fits-all” approach would not be appropriate for every patient. Studies that can address these unmet needs in patients with heart failure would provide a breakthrough in this research field. The aim of this Special Issue is to highlight advances and perspectives in the context of diagnosis, treatment, and risk stratification toward precision strategy for patients with heart failure.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
