Recent Advances in Prostate Cancer Treatment

Message from the Guest Editor

Prostate cancer mostly affects men in the golden years of their lives and is currently the leading cause of non-cutaneous death, second probably only to lung cancer. We are still struggling with questions about whom to screen, how to not overdiagnose, overtreat, and preserve the quality of life in men who need treatment. Significant strides in clinical research spanning from molecular and genetic testing to imaging and targeted focal therapies have been reported in recent years. Join us in exploring these advances. Our goal is to publish concise and clinically relevant information that will help to educate, clarify, and explore future research venues. We look forward to your submissions, including clinical studies for staging and risk stratification of the disease, and targeted focal therapy outcomes and potential adjuvant therapies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
