The Alcohol Hangover: Causes, Consequences, and Treatment

Message from the Guest Editors

Since the founding of the Alcohol Hangover Research Group in 2010, research on alcohol hangovers is increasing and on the move. Today, much remains unknown about the pathology of the alcohol hangover. However, current research into alcohol metabolism and the immune system significantly increases our understanding of the alcohol hangover. Other researchers have focused on genetics, behavioral aspects, personality, and psychological correlates of the alcohol hangover, or the impact of food and daily diet. The obtained knowledge is essential to developing the ideal hangover treatment. Unfortunately, despite the high consumer demand for an effective and safe hangover treatment, scientific research on the efficacy of hangover treatments and cures is scarce. The present Special Issue aims to provide an overview of the latest research on the causes, consequences and treatment of the alcohol hangover. The combination of original research articles and review papers will provide clinicians with up-to-date knowledge on the alcohol hangover. Dr. Joris C Verster

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
