Management, Diagnosis and Pathophysiology of Antiphospholipid Syndrome: Current Updates and Future Approaches

Message from the Guest Editor

Antiphospholipid syndrome (APS) is an autoimmune disorder associated with life-threatening complications that, despite therapeutic advances, continues to cause significant mortality and morbidity. APS-associated clinical manifestations are heterogeneous and diverse, varying from venous, arterial thrombosis to catastrophic APS (CAPS) and pregnancy morbidity. APS is often associated with other autoimmune conditions, such as systemic lupus erythematosus, leading to a more severe course of disease. Unfortunately, the diagnosis and management of APS continue to prove challenging for clinicians.

The scope of this Special Issue, which will include original papers and reviews, is to provide an updated overview of the progress and advances in the treatment and pathophysiology of APS that will aid in the accurate diagnosis and management of this devastating disease to prevent its deleterious consequences.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
