

Special Issue

Current Role of Apheresis in Neurological Disorders

Message from the Guest Editor

I invite you to submit your valuable research to our new Special Issue “Current Role of Apheresis in Neurological Disorders”. This Special Issue is a follow-up to our previous Special Issue “Apheresis in Neurological Disorders”, which highlighted the importance of immunoadsorption and plasma exchange in current clinical practice and significantly contributed to define the current standards. With this Special Issue, we would like to acknowledge the growing importance of this subject and recent developments in the field. We invite you to submit articles related to clinical studies on apheresis in neurological indications, which may include original research papers as well as reviews, and we also welcome basic research articles related to the underlying immunology. Furthermore, we appreciate works which outline new techniques of apheresis or highlight future areas of application or upcoming clinical trials.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
