Application of Opioids in Clinical Medicine

Message from the Guest Editor

There have been enormous changes in how we use opioids in the past 40 years, especially in high-income countries. In the 1970s and 1980s, opioids were only reserved for acute pain, surgical pain, or palliative cancer patients. In the 1990s, with the advent of long-acting formulations, there was a spread of using opioids for conditions that were not life-threatening, such as mechanical back pain, inflammatory pain, and neuropathic pain. With the large amount of people taking opioids, there was a surge of many people who became dependent and addicted. Consequently, those people who cannot get opioids from prescriptions need to obtain them from illicit sources, which opened the markets for more and more potent opioids, including oxycodone, heroine, fentanyl, and more recently carfentanyl. We are interested in studies looking at the clinical applications of prescription opioids, neurobiological mechanisms in humans, clinical trials, meta-analyses, education for prescribers, and policy and programs to mitigate the risks of opioids.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
