Special Issue

New Frontiers in Arrhythmogenic Cardiomyopathies

Message from the Guest Editor

Arrhythmogenic cardiomyopathies (ACMs) are a group of cardiac diseases that are characterized by fibrofatty infiltration of the myocardium and increased risk of ventricular tachyarrhythmias. In arrhythmogenic right ventricular cardiomyopathy (ARVC), which is the most typical and best described form of ACM, mutations in genes coding for desmosomal proteins account for most familial cases. The disease is usually progressive. causing left ventricular (LV) involvement and heart failure in later stages. However, there is now growing evidence demonstrating LV involvement even in earlier stages of ACM. Predominantly LV disease associated with early occurrence of ventricular arrhythmias has also been increasingly recognized. The nomenclature and classification of ACMs have been a matter of constant debate for experts in this field. Despite numerous publications in the medical literature in recent years, ACM still continues to be a challenging clinical entity. The aim of this Special Issue is to highlight recent advances in ACMs in the context of diagnosis, risk prediction, and therapy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
