# New Frontiers in Arrhythmogenic Cardiomyopathies

### Message from the Guest Editor

Arrhythmogenic cardiomyopathies (ACMs) are a group of cardiac diseases that are characterized by fibrofatty infiltration of the myocardium and increased risk of ventricular tachyarrhythmias. In arrhythmogenic right ventricular cardiomyopathy (ARVC), which is the most typical and best described form of ACM, mutations in genes coding for desmosomal proteins account for most familial cases. The disease is usually progressive, causing left ventricular (LV) involvement and heart failure in later stages. However, there is now growing evidence demonstrating LV involvement even in earlier stages of ACM. Predominantly LV disease associated with early occurrence of ventricular arrhythmias has also been increasingly recognized. The nomenclature and classification of ACMs have been a matter of constant debate for experts in this field. Despite numerous publications in the medical literature in recent years, ACM still continues to be a challenging clinical entity. The aim of this Special Issue is to highlight recent advances in ACMs in the context of diagnosis, risk prediction, and therapy.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
