Artificial Intelligence in Radiology: Present and Future Perspectives

Message from the Guest Editor

One of the most promising areas of health innovation is the application of *artificial intelligence* (AI) in medical imaging, including but not limited to image processing and interpretation. Indeed, AI may find multiple applications, from image acquisition and processing to aided reporting, follow-up planning, data storage, data mining, and many others. Due to this wide range of applications, AI is expected to have a massive impact in the radiologist's daily life, and the potential benefits of AI in radiology are immense. This Special Issue aims to collect papers which discuss AI applications, analyze various aspects related to the integration of AI into the radiological workflow, and provide an overview of the balance between AI threats and opportunities for radiologists. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
