Current Concept and Emerging Treatments in Autoimmune Bullous Skin Disorders

Message from the Guest Editor

Autoimmune bullous diseases are typical examples of autoantibody-mediated, organ-specific autoimmune disorders. Although there are still gaps in the precise description of their pathogenetic mechanisms, we know that the key step is the formation of circulating and tissue-bound autoantibodies against target adhesion structures of the skin and mucous membranes. This spectrum of diseases was included in the spectrum of orphan diseases for decades. After the introduction of systemic steroids, most of the available immunomodulatory additive medications were not able to achieve a significant and durable therapeutic response. Rituximab was a huge step in the treatment of pemphigus, and many more targeted therapies have been investigated in pemphigus, bullous pemphigoid and other less frequent autoimmune bullous diseases. In this issue, we expect to present information on the emerging therapies in this extremely interesting field of dermatology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
