P4 Reproductive Medicine: Prediction, Prevention, Personalization, and Participation in Infertility Care

Message from the Guest Editors

Infertility affects 10–15% of couples worldwide, with a growing burden in Western countries. At present, the primary objective of modern reproductive medicine (P4 reproductive medicine), that, in the past, was only to achieve a pregnancy at any cost, is to fulfill the expected cumulative live birth rate in each couple in the shortest time, with the least possible risks and stress for the patients. The achievement of this goal implies the proper application of the existing technologies to elicit precise diagnoses of infertility through the synergistic contribution of a multidisciplinary team.

In this Special Issue, we would like to invite original clinical and basic research articles, meta-analyses and systematic reviews, aiming to improve the body of evidence on diagnostic and therapeutic strategies that embrace gynecological, andrological, and embryological interests.

We would be grateful to receive your submissions to move the field of reproductive medicine forward.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
