Bone Regeneration in Dentistry, Oral and Maxillofacial Surgery: Part II

Message from the Guest Editor

An understanding of a wide range of bone regeneration, from periodontal defects to jawbone deficiency, is required in the daily practice of dentistry and oral and maxillofacial surgery. In particular, demands for bone regeneration are increasing due to the advancement of aging in our society. Autogenous bone grafts are still widely used as the gold standard because of their superior osteogenicity, though it has disadvantages such as limited availability and donor-site morbidity. However, recent advancements in material sciences and stem cell biology enable us to develop new strategies to regenerate bone deficiencies in the oral and maxillofacial regions. Thus, many clinical studies using new biomaterials, biological molecules, and/or stem cells have been conducted. This Special Issue is intended to provide an overview of the recent advances in bone regeneration in dentistry and oral and maxillofacial surgery, and to give readers an idea of the strategies to standardize bone regeneration in the next era. Research articles and reviews are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
