The Diagnosis and Treatment of Spinal Infections—Series 2

Message from the Guest Editor

At present, spinal infections are a growing problem. The aging of the population, intravenous drug use, immunosuppressive conditions, multiple and complex comorbidities, and increase in the use of invasive spinal and other medical procedures over many decades has contributed to an increase in the number of spinal infections.

In the surgical treatment of spinal infections, the use of instrumentations within the infected area of the spine has been increasingly discussed. Despite concerns regarding the presence of foreign material at the infection site, many surgeons have suggested the use of instrumentation for spinal reconstruction or stability. There is no consensus about which treatment method is superior. Despite such debates, implants placed in active infections have been shown to be safe and efficacious in clinical studies.

This Special Issue on spinal infections seeks to find solutions to many unanswered questions that plague clinicians. Therefore, this Special Issue will provide a comprehensive focus on spinal infections, exploring current trends in the identification, epidemiology, diagnosis, treatment, outcomes, and complications of spinal infections.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
