Special Issue

Hip and Knee Replacement: Clinical Advances and Current Challenges

Message from the Guest Editors

Total hip and knee arthroplasty are recognised as successful and a cost-effective interventions for degenerative disease, especially osteoarthritis. The most common reasons for revision surgery are implant loosening, fracture, dislocation and infection. Imaging outcomes are used to assess and diagnose the common failure mechanisms. Radiographic imaging techniques including computed tomography (CT), magnetic resonance imaging, and plain X-rays have all been used to monitor implant survivorship following hip and knee arthroplasty

This Special Issue will provide an overview of the current advances in orthopaedic implant imaging outcomes. We believe this Issue will be a valuable resource for clinicians and researchers looking to apply the latest imaging outcome measures to their clinical studies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
