Clinical Management of Patients with Cognitive Disorders

Message from the Guest Editor

Cognitive disorders are common symptoms of neurodegenerative and other neurological diseases, such as trauma and stroke. They have a substantial impact on daily life functioning and represent a growing public health concern with significant social and economic implications. Appropriate management includes the recognition of cognitive deficit presentations and timing throughout the disease course, and the incorporation of different therapeutic strategies (pharmacological and non-pharmacological) to focus on improving quality of life, promoting functional status, limiting residual defects, and on reducing the caregiver's burden. Unfortunately, the therapeutic options for these conditions remain limited and often ineffective. The goal of this Special Issue is to provide scientific evidence for the latest and most advanced research on management of cognitive disorders, including the potential contribution of new approaches for brain training. We encourage authors to submit original research articles, critical reviews, in-depth reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
