Clinical Infections in Hemodialysis Patients

Message from the Guest Editors

Infection is an important cause of morbidity and mortality among hemodialysis patients. Hemodialysis patients cause various infections not only bacterial but also fungal, mycobacterial or viral infection. In clinical settings, attending physicians should differentiate various infectious diseases and accomplish the appropriate treatment. However, epidemiological information (morbidity and mortality) on such infections in hemodialysis patients is limited, and specific risk factors for the development of infections and mortality, key features to suspect, the novel methods to improve accurate diagnosis and new strategies to improve clinical care are required. The optimization of antimicrobial dosing, treatment duration and management of infections in hemodialysis patients also needs to be developed. This Special Issue aims to publish high-quality manuscripts related to the clinical infections in hemodialysis patients. In the era of the elderly dialysis population, further research to improve medical practice of infections in hemodialysis patients is warranted. We eagerly anticipate the submission of your pioneering initiatives and research accomplishments in this domain.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
