# Percutaneous Coronary Intervention: Clinical Updates and Perspectives

### Message from the Guest Editor

It has been more than 40 years since the first percutaneous coronary angioplasty (PCI) was performed. Since then, significant advances in the field of interventional cardiology have been accomplished. In contemporary clinical practice, radial artery is considered the safest site for access, substituting the femoral artery as the by-default option for gaining access. Intracoronary imaging (intravascular ultrasound and optical coherence tomography)-guided PCI has been associated with better outcomes compared to conventional PCI. New cutting-edge devices have been added to the armamentarium of the interventional cardiologist, facilitating PCI and improving its results. Intravascular lithotripsy is a safe and effective option for the preparation of severely calcified lesions. New-generation stent platforms have reduced the rates of in-stent restenosis, and they have overcome first-generation drug-eluting stents' Achilles hill, namely stent thrombosis, while drug-eluting balloons aspire to overcome stent-related complications by leaving no material in the patient's coronary artery tree.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
