The Latest Research in Clinical Neuroradiology

Message from the Guest Editor

What do we expect to happen in the next few years in the field of diagnostic and interventional neuroradiology, but also in neuroscience research? New developments have been made in the field of neuroradiology and have established powerful methods for saving patients' lives and improving their quality of life. A broad range of computer-aided methods for analyzing and quantifying brain structure and function has been put on the market. These methods promise to increase the sensitivity for detecting brain abnormalities, which may be invisible to the human eye. In the field of interventional stroke treatment, big steps forward have been made, and preoperative task-based fMRI is a more and more practical and more and more highly sensitive tool for localizing eloquent cortical areas in patients affected by brain tumors. Furthermore, MRI has led to improvements in the accuracy of multiple sclerosis diagnosis and a deeper understanding of disease progression. Neuroimaging helps physicians diagnose mental illnesses and find novel treatments for them.

Guest Editor

Dr. Daniele Corbo

Neuroradiology Unit, Department of Medical and Surgical Specialties, Radiological Sciences and Public Health, University of Brescia and ASST Spedali Civili Hospital, Brescia, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
