Clinical Updates in Reproductive Endocrinology

Message from the Guest Editors

Several problems in reproductive endocrinology still represent a challenge. One of the reasons for this is that reproductive endocrinology is still not sufficiently researched. There are a number of endocrine disorders that make it difficult to get pregnant and complicate the course of pregnancy. Furthermore, an underestimated number of patients with endocrine disorders suffer from mental problems that affect their reproduction ability. An equally important issue is the improvement in the quality of life of people struggling with endocrine problems while trying to conceive and the late consequences (metabolic and psychological) of the treatment of endocrine disorders during the reproductive period. This Special Issue aims to present a comprehensive review of advances in the diagnosis and treatment of reproductive endocrine disorders, with a particular emphasis on the clinical application of the latest findings in the treatment of infertility and the subsequent consequences of endocrine diseases. Researchers in the field are encouraged to contribute their research findings in the form of original articles, meta-analyses or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
