

## Special Issue

# Atrial Fibrillation: Therapeutic Strategies and Challenges

### Message from the Guest Editors

The aim of this Special Issue of the *Journal of Clinical Medicine* is to provide the reader with a comprehensive and up-to-date overview of atrial fibrillation, including current thinking regarding its pathogenesis, novel contributors to clinical risk, contemporary approaches to diagnosis, and state-of-the-art pharmacotherapy as well as catheter-based management. We hope to provide the reader with the most current understanding of this common rhythm disorder to equip them with the knowledge to better understand current management options to appreciate the science behind current society-based management guidelines. In this Special Issue, we invite basic science and clinical researchers to submit high-quality original manuscripts providing current insights into the prevalence, pathophysiology, diagnosis, prevention, and treatment of atrial fibrillation.
