Recent Advances in Glaucoma Management

Message from the Guest Editor

We have seen remarkable innovations in glaucoma treatment and management over the last ten years. The way we treat glaucoma is continuously changing and improving with the introduction of novel medications, laser procedures, and surgical methods. Patients' quality of life has never been put so much at the center of our glaucoma management as today. In this Special Issue, we would like to highlight some of the recent advances in glaucoma treatment and management that have the potential to change our daily clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
