Anesthesia and Pain Management for Women

Message from the Guest Editors

Pain perception and its expression vary by gender and other factors. Genotypic and phenotypic differences in pain between the sexes are conditioned by anatomical, physiological, neural, hormonal, psychological, and other factors, such as the response to pharmacological treatment to control pain. Women are particularly impacted by both acute and chronic pain with higher prevalence and a greater level of pain-related disability compared to men. Moreover, medications used for anesthesia or pain control are often not tailored to the woman or to the specific underlying disease. Sex-related influences on anesthesia and pain remain a topic of great interest in literature. Pain control and anesthesiological techniques remain suboptimal in many female pathologic disorders. In this Special Issue of the *Journal of Clinical Medicine*, we invite you to submit your latest research papers in the form of an original article or review, on anesthesiologic management, and acute and chronic pain control techniques tailored to women.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
