Cardiac Surgery: Current Treatment and Future Options

Message from the Guest Editor

Currently, the treatment of valvulopathies has shifted toward more minimally invasive surgical and endovascular techniques that make patient recovery faster, thus reducing health care costs. The proposed collection "Current Treatment and Future Options" will include a selection of research papers by experts in the field of minimally invasive cardiac surgery on valvulopathies, detailing various aspects for basic, clinical and translational research that can be applied to the diagnosis and treatment of various valvulopathies. The collection is aimed to be a concise but comprehensive work that will help surgeons in training as well as experienced practitioners in their daily practice, providing up-to-date evidence on the topic of diagnosis and management of valvulopathies.

Guest Editor

Dr. Francesco Patané

Division of Cardiac Surgery, Department of Cardio-Thoracic-Vascular Surgery, University of Messina - Papardo Hospital, Messina, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
