

## Special Issue

# Recent Research in Diagnosis and Treatment of Benign Osteocytic Tumours (Osteoma, Osteoid Osteoma, Osteoblastoma)

### Message from the Guest Editors

Benign Osteocytic Tumours are common lesions representing more than 10% of all the benign bone tumours and are usually diagnosed in young people. When symptomatic, they may provoke disabilities, require long-term medication therapies, and can impair the development of the skeleton when manifesting in childhood. Their surgical management, however, along with long-term medication therapies, can lead to complications. For this reason, a deep knowledge of Benign Osteocytic Tumours (from diagnosis to the follow-up studies) is needed to choose the most appropriate treatment. Over the last few years, interventional radiology has seen a great development in the management of these lesions. Accordingly, the employment of interventional techniques is potentially an interesting solution to achieve acceptable risk-benefit ratios.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
