Big Data and Artificial Intelligence-Driven Research in Ophthalmology

Message from the Guest Editors

In recent years, artificial intelligence (AI), which learns and makes decisions by computers based on data, has been introduced in various fields of medicine. In ophthalmology, since the cornerstone study on the development of deep learning algorithm of fundus photographs for diabetic retinopathy in 2016, much research adopting AI for diagnosis or prognosis prediction of the diseases is actively being published. Also, a lot of studies using big data have validated several previously presented hypotheses in the general population. Research using big data and AI has enabled automated disease screening, diagnosis or risk prediction, and strong power of verification on subtle topics, as well as a discovery of new knowledge by computer. Although it is obvious that there are still some challenges that big data analysis and machine learning technology need to overcome, these data-driven research designs are very crucial in future studies in ophthalmology. We want to activate big data and AI-driven researches in ophthalmology and become a stepping stone for the future. We look forward to receiving your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
