

## Special Issue

# Treatment of Bipolar Depression

### Message from the Guest Editors

In terms of neuropsychiatric diseases, Bipolar Disorder (BD) is one of the main contributors to chronic disability throughout the world. Intrinsically, BD is characterized by highly unstable mood and recurring episodes, which are poorly responsive to current available treatment strategies. Indeed, although monotherapy is suggested, the use of several, often unapproved, therapeutic combinations seems the rule. Bipolar depression is particularly unresponsive to treatments. To date, scientific evidence points out some encouraging strategies based on pharmacotherapeutic add-ons or experimental treatments. However, more and more precise and systematic studies are needed in order to shed light on this intricate argument. The present Special Issue aims at deepening the present knowledge on clinical treatment approaches to Bipolar Depression, based on the ultimate neurobiological physiopathogenetic scientific evidence. This issue will provide a useful tool to address the most fitting therapies for complex cases in everyday clinical practice.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
