New Trends in Brain Glucose Metabolism, Morphology and Function

Message from the Guest Editor

Alzheimer's Disease (AD), obesity, and Type 2 Diabetes Mellitus (T2DM) are intertwined by alterations in brain glucose metabolism and lifestyle interventions have been actively employed for their prevention and treatment. But only recently, brain glucose metabolism has started to be seen as the therapeutic target of such interventions. This Special Issue will provide updated knowledge of brain glucose metabolism as primary or secondary mediator of disease and as a potential target for lifestyle interventions in management of metabolic and neurologic diseases. This would potentially bring researchers to invest more efforts in the field and clinicians to increase awareness about the relevance of the alterations of the brain glucose metabolism.

Guest Editor

Dr. Marco Bucci

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
