

## Special Issue

# Brain Networks in Disorders of Consciousness

### Message from the Guest Editors

Disorders of consciousness (DOC) represent a big and multi-perspective challenge of contemporary clinical neuroscience. First, measuring consciousness and identifying the mechanisms of unconsciousness are still open issues that neuroimaging and neurophysiology are trying to answer with different and complementary approaches. Second, the identification of the level of gravity of a patient with DOC still has some margins of uncertainty; this implies that even prognostic methods are still not optimal. Third, conventional medical interventions and therapies often do not have a substantial impact on the clinical course in these patients. New interventions based on invasive or non-invasive neuromodulatory approaches are emerging, but are still investigational. Nevertheless, DOC represent an increasing burden for the different health care systems worldwide. The concept of this Special Issue is to look at DOC from a brain network perspective. An integrated network-based approach will hopefully help to better understand the neural mechanisms underlying consciousness (the most complex—and still unsolved—brain construct) and its dysfunctions.

### Guest Editors

Dr. Simone Rossi

Brain Investigation & Neuromodulation Lab (Si-BIN Lab) at the Department of Medicine, Surgery and Neuroscience, Neurology and Clinical Neurophysiology Unit, University of Siena, 53100 Siena, Italy

Prof. Dr. Mario Rosanova

Professor of Physiology, Department of Biomedical and Clinical Sciences "L. Sacco", Laboratory for the Analysis of Bioelectrical Signals (LASEB), University of Milan, Milan, Italy

### Deadline for manuscript submissions

closed (31 March 2020)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
