Bugs and Drugs—the Gut Microbiome as Hidden Metabolic Organ and Its Role in Personalized Pharmacotherapeutics

Message from the Guest Editors

Pharmacomicrobiomics is a new, dynamically developing field of medicine. The microbiome enzyme apparatus contributing to the intestinal ecosystem is partially responsible for the metabolism of xenobiotics, including drugs and dietary supplements. This activity may lead to several enzymatic reactions potentially responsible for a given therapeutic effect or lack of drug efficacy. The metabolites of the intestinal microbiota may compete with drugs for enzymes or receptors involved in therapeutic pathways of common medicines. With this Special Issue in the *Journal of Clinical Medicine*, we focus on studies exploring the amazing interactions between gut microbes and the variety of medicine and dietary supplements commonly used in everyday clinical practice. We invite authors to share the results of their research. We welcome original and review papers on topics related to pharmacotherapy or any other therapeutic modalities with the potential to influence and interact with gut microbiota. Last but not least, therapies aimed at improving the metabolic status of an individual through microbiota modulation are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
