

## Special Issue

# Attention-Deficit/Hyperactivity Disorder (ADHD): Advances in Diagnosis and Treatment

### Message from the Guest Editor

This Special Issue of the Journal of Clinical Medicine aims to highlight the latest research on ADHD, focusing on advancements in diagnosis, treatment, and long-term management. We invite original research articles and comprehensive reviews that investigate innovative diagnostic methods, address new pharmacological and non-pharmacological treatment options, and explore strategies for managing comorbid conditions. Our goal is to provide insights that improve clinical outcomes and support effective, individualized treatment approaches for people with ADHD across all ages.

Through this Special Issue, we aim to gather a comprehensive selection of research that can inform and improve clinical practice, support effective management strategies, and ultimately enhance the lives of individuals affected by ADHD.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
