Management of Diabetes-Related Cardiovascular Disease: Current Treatment and Future Options

Message from the Guest Editors

Cardiovascular disease (CVD) and diabetes mellitus are two of the most prevalent and interrelated chronic conditions worldwide, contributing significantly to global morbidity and mortality. Diabetes is a major risk factor for the CVD development and progression, and their coexistence presents complex challenges for clinical management and public health. This Special Issue aims to explore the multifaceted relationship between diabetes and CVD, including current treatment strategies and emerging therapeutic options. We invite contributions that address the pathophysiological mechanisms, novel biomarkers for early detection, and innovative approaches to risk stratification. Topics include lifestyle interventions, pharmacological therapies, advances in glucose-lowering agents with cardiovascular benefits, and integrated care models. Special attention will be given to clinical trials that improve patient outcomes. By bringing together original research articles and reviews, this Special Issue highlight advances in managing diabetes-related cardiovascular complications. Our goal is to foster interdisciplinary dialog and promote evidence-based strategies across healthcare settings.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
