Special Issue

Clinical Advances in Angina Pectoris

Message from the Guest Editors

Angina pectoris is a chronic disabling condition affecting a growing number of patients with ischemic heart disease. It becomes refractory when complaints persist despite optimal medical therapy due to severe and/or diffuse coronary artery disease (CAD) without options for percutaneous or surgical revascularization procedures. The availability of advanced physiology measurements allows us not only to better identify patients with epicardial and microvascular disease, but also to guide the cardiologist to the best treatment option. Similarly, the continuous improvements in materials and techniques for complex revascularisation procedures allow for not only an extremely high success rate, but also for a less invasive approach and potentially reduced complications rate. Finally, a recently introduced device for the treatment of refractory angina may provide additional tools when revascularisation procedures and physiology-guided optimal medical therapy are not sufficiently effective. We welcome authors to submit papers on the clinical advance of refractory angina as well as angina without obstructive coronary artery disease in terms of both diagnosis and treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
