

## Special Issue

# Medical Cosmetic Skin Diseases: Starting from Acne and Facial Dermatitis

### Message from the Guest Editors

Due to recent awareness of the impacts of facial skin diseases on life quality and mental stress, it is necessary to improve the understanding of the mechanism and therapy for these diseases including acne, rosacea, seborrheic dermatitis and so on. The mechanism of different facial dermatitis has not been completely clarified. In addition, the treatment of recurrent facial dermatitis and the problems left behind, such as facial erythema, pigmentation and scarring, also poses a challenge to clinicians. The objective of this Special Issue is to attract and encourage the submission of novel mechanisms, clinical manifestations, key points for diagnosis, techniques and therapies for facial inflammatory diseases, to enhance the advances in these skin diseases. We welcome researchers from cosmetics, academia and related-industry to provide their state-of-the-art technologies and ideas covering all aspects of better management of facial inflammatory diseases.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
