Clinical Research in Palliative Care

Message from the Guest Editor

Advanced care planning is crucial given the prognostic uncertainty in cancer survivorship, which increasingly mirrors chronic conditions such as heart failure. Effective planning can help patients navigate the unpredictable nature of the disease, manage challenges posed by therapies and prepare for end-of-life care. Palliative care plays a pivotal role in these aspects, necessitating focused research. Evidence-based symptom management remains inadequate due to many common issues. Difficult-to-treat pain, including opioid-resistant, cancer-related neuropathic pain and pain from bone metastases, poses significant threats to patients' QoL. Research is urgently needed to develop effective treatments for these pain types, enhancing the overall PC strategy. This Special Issue calls for contributions exploring these critical areas, aiming to advance our understanding and improve the lives of cancer patients and their families. Keywords

- cancer palliative care
- total pain
- advanced care planning
- spiritual care
- financial toxicity
- cancer-related pain

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
