

## Special Issue

# New Insights of Respiratory and Critical Care Research

### Message from the Guest Editors

With the global spread of COVID-19, respiratory and critical care practices have increasingly drawn public attention, and their improvement is a challenge facing the research community. Looking at the development in this field over the past ten years, we believe that there are several potential directions that are worth exploring, including new discoveries of omics technologies for respiratory and critical care contexts; new understanding of the roles of organoids in lung injury and repair mechanisms; exploration of pathophysiological changes in acute respiratory failure and severe respiratory distress by bedside visualization; respiratory support methods for lung protection and damage; new revelations surrounding the roles of data and artificial intelligence in the diagnosis and treatment in respiratory and critical care contexts.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
