

## Special Issue

# Cardiac Magnetic Resonance (CMR), Coronary Computed Tomography Angiography (CCTA) and Invasive Functional Assessment in Coronary Disease

### Message from the Guest Editor

In recent years, the diagnostic approach and therapeutic management of patients with coronary heart disease has changed dramatically. The possibility of performing an accurate non-invasive diagnostics (i.e., CCTA) capable of discriminating patients has found its consecration in important international studies. In the same way, the possibility of having accurate data on myocardial viability (i.e., CMR) has made coronary angioplasty an increasingly precise and effective tool for the patient. In this panorama, having both hyperemic (e.g., FFR) and non-hyperemic (e.g., iFR) functional evaluation indices has made it possible to better treat patients who do not have pre-procedure evaluations, significantly reducing inappropriate angioplasty and the number of stents implanted. At the same time, the evaluation both by CMR and by pressure wire (IMR, CFR) of the coronary microcirculation in addition to pharmacological tests has allowed us to better classify the various types of angina. The purpose of this Special Issue is to analyze the new discoveries in the field of coronary heart disease by focusing on research in the invasive and non-invasive diagnostic field.

### Guest Editor

Dr. Matteo Tebaldi

Cardiology Unit, Azienda Ospedaliera Universitaria di Ferrara, Cona, FE, Italy

### Deadline for manuscript submissions

closed (30 September 2021)

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
