

Special Issue

COVID-19 and Venous Thromboembolism

Message from the Guest Editor

Coronavirus disease 2019 (COVID-19) caused by SARS-CoV-2 has become a global concern, having a universal impact on humanity. It has been established that COVID-19 may predispose patients to thrombotic events with severe impact on their prognosis. The activation of the coagulation system with thromboembolic manifestations, including deep vein thrombosis, pulmonary embolism, arterial thrombotic events, and disseminated intravascular coagulopathy (DIC), has been described in several stage of COVID-19 disease. A favorable outcome has been reported with the use of heparin in COVID-19 patients, especially in those with markedly high D-dimer levels or with sepsis-induced coagulopathy. Conversely, little is known about the role of fondaparinux and direct oral anti-coagulants (DOACs). This Special Issue of the Journal of Clinical Medicine focuses on the update of mechanism of coagulation impairment, vascular manifestations, and therapeutic antithrombotic strategies/approaches.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
