Clinical Features and Outcomes of COVID-19 in Older Adults

Message from the Guest Editor

Since the first reported case in December 2019, the SARS-CoV2 pandemic has claimed millions of lives worldwide. Older adults are at high risk of worse outcomes, especially as carriers of various comorbidities. After the first wave, a better understanding of the pathophysiology and clinical course of COVID-19, associated with the growing and widespread knowledge of non-invasive respiratory support techniques and the introduction of effective pharmacological treatments, led to significantly better management of these patients. The availability of effective and safe vaccines has therefore drastically reduced the morbidity and mortality of COVID-19. However, repeated doses are necessary to effectively protect against infection and severe disease. At present, only the most developed countries have achieved the goal of mass vaccination. This Special Issue aims to provide updates on the clinical aspects and outcomes of COVID-19 in older adults in different countries, especially in light of the introduction of vaccines and new treatments. I look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
