Modern Gynecological Surgery: Clinical Updates and Perspectives

Message from the Guest Editor

The most adequate gynecological surgery for different gynecological diseases always depends on new developments in the field. Recent scientific updates are not just influential. They constitute possible alternative therapies that have to be implemented to achieve individual and tailored patient treatment. This often means that a shift in the treatment itself or in the concomitant therapy has to be taken into account. In the frame physicians and surgeons work in, bearing in mind the eventual health care budget and country-related restrictions, an open-minded evaluation of existing and newly developed surgical options also constitutes securing the best possible care for the patients. This Special Issue enables scientifically active surgeons to submit their contributions, thereby playing an active role in the improvement of women's health care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
