Migraines: Diagnosis and Treatment

Message from the Guest Editors

Migraines have been a longstanding concern in the medical field, representing the most common neurological disorder. We aim to consolidate the latest advancements in understanding and managing migraines, and will explore innovative approaches to diagnosis, cutting-edge therapeutic interventions, and emerging trends in the field. This Special Issue will showcase groundbreaking research on migraines, highlighting studies that employ advanced diagnostic techniques, genetic analyses, and personalized medicine approaches. By encompassing a variety of research methodologies, we aim to offer a comprehensive overview of the current state of migraine research and treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
