

## Special Issue

# Migraines: Diagnosis and Treatment

### Message from the Guest Editors

Migraines have been a longstanding concern in the medical field, representing the most common neurological disorder. We aim to consolidate the latest advancements in understanding and managing migraines, and will explore innovative approaches to diagnosis, cutting-edge therapeutic interventions, and emerging trends in the field. This Special Issue will showcase groundbreaking research on migraines, highlighting studies that employ advanced diagnostic techniques, genetic analyses, and personalized medicine approaches. By encompassing a variety of research methodologies, we aim to offer a comprehensive overview of the current state of migraine research and treatment.
