Special Issue

Current Challenges and New Perspectives in Liver Transplantation

Message from the Guest Editors

We would like to invite you to contribute to this Special Issue. Liver transplantation (LT) has evolved significantly over the past few decades, becoming a life-saving treatment for various acute and chronic liver diseases. Despite major advances in surgical techniques, immunosuppression, and patient selection, LT still faces several persistent challenges.

This Special Issue aims to provide a comprehensive overview of the current state and future directions in liver transplantation. It seeks high-quality contributions that align with the journal's scope.

Topics of interest include (but are not limited to) the following:

    Expanding indications for liver transplantation;
    Biomarkers and imaging in transplant evaluation and follow-up;
    Post-transplant complications and immunosuppression strategies;
    Outcomes in special populations;
    Artificial liver support systems and bridge-to-transplant strategies;
    Recurrent and de novo malignancies post transplant;
    The role of artificial intelligence and precision medicine in transplant decision making.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
