Latest Advances in Delivery and Outcomes of Cardiac Resynchronization Therapy

Message from the Guest Editor

Cardiac Resynchronization Therapy (CRT) is an established technique to improve morbidity and mortality in selected heart failure patients. This technique has been a game changer for heart failure treatment in patients with conduction delay, who are often non-responders to optimal medical treatment. Unfortunately, rates of non-response to CRT are from 30% to 50% depending on the outcome parameter that is chosen. Non-response rates are due to suboptimal delivery of CRT, patient selection, and device programming. Furthermore, there is controversy on which parameter and cut-off should be used to define the CRT response. With this Special Issue, we would like to highlight recent advances in the improvement of the CRT response, including, but not restricted to, strategies to optimize implantation techniques, patient selection, or CRT programming. We encourage researchers to submit their results and proposals on how to provide optimal CRT. The measurement of outcome variables such as exercise capacity, quality of life, reverse remodeling, as well as occurrence of atrial and ventricular arrhythmias is essential to evaluate the success of this powerful treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
