Cardio-Oncology: Novel Concepts in Diagnosis, Prevention and Treatment of Cardiotoxicity, from Gender Differences and Beyond

Message from the Guest Editors

Significant improvements in recent decades in the diagnosis and therapy of a variety of cancers have profoundly transformed several neoplasms, from incurable conditions to chronic diseases. On the other hand, therapeutic advances have led to increased morbidity and mortality due to treatment side effects. In this clinical scenario, cardiovascular (CV) disease is evolving as a crucial cause of morbidity and death in many cancer survivors. The latter may be the result of cardiotoxicity as well as the enhanced development of CV disease, especially in the presence of traditional CV risk factors. Moreover, CVD and cancer share several overlapping risk factors such as age, tobacco habit, obesity and sedentary behavior. Cardio-oncology represents a relatively new subspeciality focusing on the diagnosis, prevention and treatment of CV complications related to cancer and its therapy. Gender differences are well known in oncological and CV diseases, but to date, they are still less enlightened in cardio-oncological scenarios. The aim of this Special Issue is to highlight recent advances in gender differences, prevention, diagnosis, treatment and prognosis in cardio-oncology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
