

## Special Issue

# Cardiopulmonary Resuscitation in Emergency Medicine: What Have We Learned and How Do We Move On?

### Message from the Guest Editor

Cardiopulmonary resuscitation, from basic life support to advanced life support to extracorporeal cardiopulmonary resuscitation (ECPR), plays a key role in increasing survival after cardiac arrest. Great efforts have been made in the last twenty years to promote the quality of this procedure as performed by both laypeople and healthcare professionals. This Special Issue aims to review the most important achievements in cardiopulmonary resuscitation in the last few decades and will present promising opportunities to improve the quality of the various kinds of cardiopulmonary resuscitation in the future.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
