Advances in Non-Invasive Cardiovascular Diagnostics

Message from the Guest Editor

Cardiac magnetic resonance (CMR) imaging has become an inevitable cornerstone of modern cardiology. Its accuracy and reliability combined with the ability to non-invasively provide comprehensive information in only one examination secured CMR's pivotal role in numerous guidelines. Though coming a long way from sole evaluation of chamber size and function via cine imaging over assessment of ischemia and viability to tissue characterization by T1- and T2-weighted imaging, drive and passion of the CMR community to achieve a further improvement is unbroken. As a result, new and innovative technologies arise constantly. Their ability to impact diagnostic pathways and clinical decision making processes needs careful and thorough evaluation – presupposing this, CMR's significance will further grow. In this Journal of Clinical Medicine's Special Issue, basic, translational and clinical CMR science will be featured. We therefore cordially invite researchers to submit their original research, systematic reviews, and short communications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
