Special Issue

Cardiovascular Risk Factors in Childhood and Adolescence

Message from the Guest Editors

Cardiovascular risk factors in childhood and adolescence are dramatically increasing due to sociodemographic changes, as well as the COVID-19 pandemic. These will create major health issues in the next generation. High- risk pregnancies, fetal programming, obesity, arterial hypertension, lifestyle factors such as physical activity, sedentary behavior, nutrition, and even social problems influence health and healthcare of children and have to be considered in effective prevention strategies. This issue will focus on studies of cardiovascular risk factors of in childhood and adolescence, and on the impact of corresponding prevention programs over the life span.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
