

Special Issue

Children Behavior and Psychophysiology

Message from the Guest Editor

Childhood is a time when children learn about and discover the world, as well as a time of rapid change and growth in their behavior and psychophysiology.

Psychophysiology serves as a way to non-invasively measure biological signals in response to psychological manipulation, which is particularly important when studying children. Psychophysiological data can include brain activity, heart rate, and hormones, among others.

The study of childhood behavior and psychophysiology is both interesting and challenging, as we are frequently measuring a moving target.

This Special Issue aims to capture an informative snapshot of ongoing, cutting-edge research across childhood concerning behavior and/or psychophysiology. This Special Issue will highlight important topics in childhood behavior and psychophysiology. Such topics can include healthy and typical childhoods, as well as atypical or disordered childhoods, investigations involving prediction and treatment, as well as novel techniques to measure behavior and psychophysiology during childhood.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
